

GermBuster™ Industrielle 500

Industrial Far-UV Disinfection System

The GermBuster™ Industrielle 500 from Sterilray is a high-output industrial Far-UV disinfection system engineered for continuous pathogen mitigation in demanding commercial and industrial environments. Utilizing advanced 222nm excimer lamp technology, the system delivers powerful air and surface disinfection while remaining safe for occupied environments within established exposure guidelines.

Key Features

- High-output 222nm Far-UV excimer lamp technology
- Continuous air and surface disinfection
- Industrial-grade construction
- Designed for large-area environmental coverage
- Mercury-free and chemical-free operation
- Continuous-duty industrial performance
- Instant on/off full-power performance
- 30,000+ hour prorated lamp life warranty

Technical Specifications

Category	Specification
Power Consumption	500W
Lamp Technology	Far-UV 222nm Excimer
Application Type	Industrial Air & Surface Disinfection
Operation	Continuous Occupied-Space Pathogen Mitigation
Power Supply	100–270V AC 50/60 Hz
Mounting Options	Ceiling / Wall / Industrial Equipment Integration
Housing Material	Powder-Coated Aluminum & Stainless Components
Environment	Commercial & Industrial Indoor Facilities
Lamp Life Warranty	30,000+ Hours (Prorated)

Power Supply Warranty	1 Year Parts and Labor
-----------------------	------------------------

Ideal Applications

Manufacturing Facilities • Food Processing Plants • Warehouses • Pharmaceutical Manufacturing • Laboratories
• Industrial Processing Environments • Agricultural Facilities • Packaging Plants • Logistics Centers
